Bringing Your 'A' Game	The Game of Life	Game Changer	Master Mind
Strategies to Support Students with Autism	Life Course Planning for Individuals with I/DD	Mental Health First Aid for Depression & Anxiety	Understanding Executive Functioning

## SPIN It to Win It!

For the past 32 years the annual SPIN conference has given parents and grandparents the opportunity to meet and network with other families and professionals while learning about resources and strategies that can improve their lives and the lives of their children. This year's conference is using the theme of **family games** for fun and decoration, and also to symbolize that spinning the wheel of knowledge is a powerful and winning path to improved quality of life and relationships.

### HOW TO USE THIS FAMILY GUIDE TO GAMES & LEARNING

The Conference includes 16 workshops organized into three sessions called **ROUNDS**. The first two **ROUNDS** offer 6 workshops of varying topics and complexity while the last **ROUND** has 4 workshops (3 of which are about specific disabilities). Look at the Conference Schedule on the left, to see your workshop choices for each **ROUND**. Then look up a description of workshops and check the program key to see what age group is covered in the presentations.

#### PROGRAM KEY:

Early Intervention/Preschool = 

Elementary = 

Middle/High = 

All Age Groups = 

NOTE: Workshops are subject to change.

# "SPIN It to Win It!"

## ROUND 1

10:20 a.m. - 11:20 a.m.

### LEVEL UP

**Transitioning to Adult** services can be stressful for both parents and students. This workshop will provide you tips, how-to's and insight on making the transition easier for your student to 'level up' into adulthood.

### INCLUSION: GAME ON!

Having more **Inclusive Classrooms** is a goal for the DOE and parents alike. This workshop will explain what inclusion is and what it isn't, how all children can benefit from being included with their peers and why it's important to have the right supports in place for inclusion to work.

### LEARNING THE RULES OF THE GAME

**Social and Emotional Learning** is the process of gaining and applying skills like understanding and managing emotions, setting and achieving positive goals, showing empathy for others, establishing and maintaining positive relationships and making responsible decisions. Pick up strategies for home and how to connect them with school life.

### PHONE A FRIEND

In this workshop, you will be learning **Coping Strategies for Families** with take-home tips and techniques to deal with the stresses that can break a family's trust and resilience. Find out how to grow your support networks, increase meaningful communication and share the load.

### CONNECT 4 KEIKI

The **Transition from Early Intervention to Preschool** is a game changer for many families. Drop in to find out about the process and choices you have to connect your keiki to DOE or private preschool and hear from parents who have made the transition successfully.

### POWER UP

Slide over to this workshop to learn how **Adapting Games with Assistive Technology** can be fun and easy. A specialist will show you simple ways for you child to be included in games for learning and play using add-ons, built-in accommodations and a little thinking out of the box.

## ROUND 2

1:20 p.m. - 2:20 p.m.

### JENGA

**Positive Behavioral Support** is used as a behavioral management system to understand why a student has continued challenging behavior and how to change the behavior using positive reinforcements. This class will give you tips, tricks and helpful ideas to build a foundation for your keiki to grow their communication, social and self-management skills.

### CLUE

There are several common **Literacy Strategies** you can use to help your child in phonics, fluency, vocabulary, comprehension and writing. This workshop will provide you with strategies you can take home and start using today.

### CHUTES AND LADDERS

What is **Universal Design for Learning** and how can it help your keiki? Come to this workshop and find out how teachers are using UDL to present information in a variety of ways to engage students and how students can share what they learned in diverse ways.

### I'LL TAKE BLISS FOR \$500

A great way for decreasing your stress levels is to learn techniques for **Mindful Meditation**. Join us to find your center, improve your breathing skills and calm your mind while taking in the art of being mindful to your surroundings and how you interact with the world.

### HUNGRY, HUNGRY HIPPOS

Keeping your patience while **Helping Picky Eaters** can be trying at best. This workshop will focus on children up to 8 years old, giving parents and caregivers some constructive tips and tricks to inspire a healthy appetite.

### STRATEGO

Many families wonder and worry over **Estate and Benefits Planning**. How do I get started? How will it affect my child's benefits? How long will it last? The answers to these and other questions can be found if you attend this workshop.

# "SPIN It to Win It!"

ROUND 3

2:30 p.m. - 3:30 p.m.

## BRINGING YOUR 'A' GAME

Communication Strategies to Support Students with Autism will provide evidence based information and ways to elicit effective communication between your child and those around them.

## THE GAME OF LIFE

A new tool in the Developmental Disabilities Division is the **Life Course Planning for Individuals with DD/ID**. This exciting new program will help families and individuals plan out support and services using a wide variety of natural, community and social supports.

## GAME CHANGER

**Mental Health First Aid for Depression and Anxiety** is a skill all of us can learn. This workshop will provide an overview of the Mental Health First Aid class and include ways to spot depression and anxiety in our youth. Knowing what to look for and how to approach a young person in need can make all the difference.

## MASTER MIND

**Understanding Executive Functions** is the key to helping keiki keep track of time, make plans, finish work on time, analyze ideas and more. Get some great ideas and tools to help your child improve their impulse control, flexibility and working memory - skills all kids can benefit from.
