SPIN’s Infographics Guide You Through COVID-19 Changes

The COVID-19 pandemic has had a huge impact on the delivery of special education services in Hawaii and nationally. School closures necessary to guarantee the health and safety of students and staff have resulted in many students losing skills. Now that school has resumed, IEP and 504 teams have been instructed to meet and assess each student’s needs during the 1st Quarter.

The following infographics were designed to help families be informed partners in the IEP process. What are infographics? They are a way of explaining complex information and bringing more people into a discussion using pictures and charts.

As you look through the infographics on the following pages, we hope you will use them as a starting point for asking for more information from your child’s IEP team members. You are always welcome to talk with SPIN and our partners below, as well.

Mahalo to the Department of Education, the Special Education Advisory Council, the Community Children’s Council Office, Leadership in Disability & Achievement of Hawaii and the State Council on Developmental Disabilities for helping to ensure the accuracy and improve the readability of these informational tools.

The SPIN Conference Goes Virtual!

Ever since we had to postpone our April 18th SPIN Conference due to COVID-19 concerns, our faithful conference planning advisors have been looking for a way to bring it back to you. Well now it’s alive again as a virtual conference! That means you can join us at no cost on your phone, tablet or computer. So please put Saturday, October 17th in big red letters on your calendar. And check out page 11 of this newsletter to see what a fun day we have planned. We hope to “see” you all there!
**Distance Learning**
This is an umbrella term for learning that does not occur in-person. Lessons can be provided by way of paper packets, online programs, or during live virtual sessions on Google Meet or WebEx. Communication may occur through messaging apps, phone calls, video calls, discussion boards, or live virtual sessions.

**Synchronous Learning**
The teacher delivers live, real-time instruction to students via Google Meet or WebEx. Students can participate in real-time and engage with their teachers and classmates.

**Asynchronous Learning**
Students work at their own pace with no real-time instruction. Learning occurs through teacher assignments (for example, paper packets, self-guided online programs, turning in English Language Arts (ELA) and Math assignments through Google docs, and other means).

**Total Distance Learning**
Students receive instruction by way of a self-paced and self-guided online curriculum like Acellus, Florida Virtual and ASU Prep Digital. Students work independently and students in general education do not typically receive instruction from a HIDOE teacher. Parents opt-in for this option for a semester or year.

**Learning Management System**
This is a platform (for example, Blackboard and Google Classroom) that helps teachers manage and organize instructional materials. It provides communication between teachers, students and parents.

**Hybrid/Blended Learning**
Students rotate between face-to-face instruction and distance learning. A variety of instructional strategies and resources are used. Models differ slightly across elementary, middle and high school.

**Face-to-Face Learning**
Students receive in-person instruction on the school campus. Priority is given to students with IEPs, English Learners, and students in grades Pre-kindergarten to 2nd Grade.

---

**7 Definitions for Learning During a Pandemic in Hawaii**
During Distance Learning, schools must implement each student’s Individualized Education Program (IEP) and provide special education, related services, and specially designed instruction (SDI). This also applies to students whose parents opt-in for Total Distance Learning.

## IEP/Section 504 Review

All students will have an IEP team meeting before the end of the first quarter. Teams must:
- Identify accommodations & modifications needed to access the instructional model,
- Develop an individualized contingency plan,
- Determine additional needs due to the school closure, and,
- Create revisions based on student needs, not on the available instructional models.

## COVID-19 Contingency Plan

Schools must prepare for any future disruptions to education. All students with an IEP must have a School Closure Contingency Plan to describe:
- What services will be provided,
- Which accommodations modifications will be needed to support distance learning, and
- If telepractice is appropriate for the student.

## COVID-19 Impact Services

Within the first quarter, each IEP team must determine if there is a need for COVID-19 Impact Services for each student including:
- Determining if there was a loss in skill(s), and
- What supports will be provided to address the skill(s) loss.

## Request for Distance Learning

With any school model, parents/guardians may opt for distance learning instead of sending their child to school. The IEP team must:
- Develop a Total Distance Learning Plan to implement the IEP to the greatest extent, and
- Include services, supports and parent training.

## Educational Environment

Placement in the least restrictive environment (LRE) has not been waived. IEP teams must remember:
- Changes to instructional models will require schools to determine how they maintain LRE.
- If a change of placement is suggested, teams must have evidence of a need and supporting data to make their decisions.

## Student Absences

When a student with a disability at high risk of severe medical complications is out of school during an outbreak of COVID-19 and the school remains open:
- A student absent less than 10 days will not be considered for change in placement.
- A student absent longer than 10 days in a row must have an IEP meeting to consider a change in placement.

Parent Tips for Virtual IEPs

During this time of closures due to the COVID-19 pandemic, schools must make every effort possible to meet required timelines by scheduling and holding your child’s Individualized Education Program (IEP) meeting online or by phone.

BE READY FOR THE CALL
- If your child’s annual IEP or initial IEP is due, you will be contacted by someone from your child’s school to set up the IEP meeting.
- If you have recently changed your phone number or email address, be sure to let the school know as soon as possible.

YOUR IEP MEETING WILL NOT BE IN PERSON
- The Individuals with Disabilities Education Improvement Act (IDEA 2004) requirements for IEP review, development, evaluations and eligibility are still in place.
- IDEA has provisions to use different ways to participate in meetings, including video conferences like Skype, Zoom or WebEx or by phone.
- Work with your child’s school to decide the best way to hold your meeting.
- Ask your school when and how you will receive documents before the meeting.

WHAT YOUR IEP MEETING WILL BE LIKE
- Your IEP meeting will not be in person. You and the IEP Team may agree to conduct IEP meetings through alternate means, including videoconferencing or telephone conference calls.
- All required IEP members must attend unless you and the school, in writing, consent to excuse a team member.
- Team members should review relevant materials ahead of time to prepare for this IEP meeting. Ask the school if you can receive copies in advance of the meeting of important information that will be used to make decisions at the meeting (like draft goals and objectives, recent evaluations, etc.).

ATTENDING YOUR IEP MEETING
- Make sure your phone or device is fully charged and you have access to a good cell or WiFi signal. You may want to dress like you would for a regular meeting.
- Have all your documents ready: your current IEP, any evaluations, classwork or other evidence, and any concerns and suggestions you have.
- Find a quiet, comfortable place with a place to write and good lighting.
- Be engaged and ask questions.
- Request a re-cap of IEP agreements before the meeting ends.

AFTER YOUR IEP MEETING
- Contact your child’s special education teacher right away, if you forgot to mention something important during the meeting discussion.
- Look for the final copy of the IEP within ten days of the meeting.

WHAT IF I NEED HELP
- Call your child’s special education teacher or the school’s Student Services Coordinator for assistance, copies of documents and current assessments.
- Call or email Leadership in Disabilities and Achievement of Hawaii @ 808-536-9684 for IEP preparation and support, and questions about IDEA and your rights.
- Call or email SPIN @ 808-586-8126 for support, information and questions about special education and community resources.

Created by SPIN and adapted from “Parent Tips for Virtual IEP Meetings” by the Oklahoma Parents Center
Using Technology to Deliver Related Services

Telepractice allows a student to benefit from related services when it is unfeasible or unsafe to deliver those services in person. It involves using technology to provide an IEP service, (like speech therapy, ABA services, counseling, etc.) remotely.

Determining the Appropriateness of the Telepractice:

The IEP team members first consider the following questions:
- Does the student need to access services at home?
- Is telepractice appropriate for this particular student and can the service be delivered via telepractice? One consideration would be does the student have access to a device and internet connection?
- Are the parents and therapist in agreement about using technology?

Determining the Need for an E-helper:

While some students are able to interact with the therapist without assistance, others may need help logging in at the scheduled time, having needed materials available, prompting through verbal or physical assists or aiding in communication. If help is needed, is a parent or other family member available and willing to assist?

Training and Support for the E-helper:

Once an E-helper is identified, the related service provider will provide any necessary training and support virtually. That means that the therapist will use videoconferencing and/or teleconferencing to provide instruction to the E-helper to enable him or her to assist the student, including helping the student complete assignments.

Setting up a Service Delivery Plan:

When the necessary technology and in-home E-helper (if required) are in place, the parent and therapist can agree on a plan and a schedule to provide services. Generally, services fall within the hours of a typical school day.

Obtaining Parent/Legal Guardian Approval:

The last step in setting up telepractice sessions is to get the approval of the student’s parent or legal guardian to receive these services.

Information in this infographic was provided by the Hawaii Department of Education, March 2020
Addressing the Impact of COVID-19 on Students with Disabilities

During the 1st Quarter of SY 2020-21 IEP and 504 Plan Teams will determine if there was a loss in skill(s) due to school closures.

**INFORMATION GATHERING**

In order to determine whether a student lost skills during the school closure from mid-March to August, information from a variety of sources should be gathered prior to an IEP or 504 Plan team meeting:

**SCHOOL DATA**

Right before and during school closure:
- 3rd & 4th Qtr. Progress Reports
- 3rd Qtr. grades
- Correspondence
- Recordings
- Observations

Since the return to school:
- Universal screening
- Informal assessments
- Observations
- Student work samples

**FAMILY INFORMATION**

- Notes
- Recordings/videos
- Correspondence with school
- Reports from other service providers
- New information

**IEP OR 504 DISCUSSION**

Meetings will be held to review the IEP or 504 Plan during the 1st Quarter of the school year to see if the plan is addressing the student’s current needs. Parents may request to have an immediate meeting, if they are concerned about big changes in their child’s academic, functional, emotional or behavioral needs.

**DETERMINING SKILL(S) LOSS OR NEEDS**

The main purpose of the meeting is to determine:
- any skill(s) loss during school closure;
- how significant was the loss; and
- how skill(s) loss will be addressed.

The method for determining loss is to compare pre-school closure data with current performance. If skill loss is considered minor, the team may recommend explicit instruction or high impact strategies available to all students (HMTSS). If the skill loss is considered significant, the IEP/504 Plan may need revision.

**REVISING THE IEP/504 PLAN**

An IEP or 504 Plan revision may be required if the student has significant skill(s) loss or needs that require individualized supports and services beyond HMTSS.

Plan revisions may include:
- Updating the Present Levels of Academic and Functional Performance (known as the PLEP)
- Designing new or revised goals or objectives, and
- Increasing the frequency or duration of related services or specially designed instruction.

When considering the need for a new related service, an assessment in that area must be done.

If the student’s skill loss or needs are significant and cannot be completely addressed through the IEP or 504 Plan, then the team must discuss the need for COVID-19 Impact Services.

**COVID-19 IMPACT SERVICES**

COVID-19 Impact Services are services to make up for the student’s skill(s) loss which are in addition to the current IEP or 504 Plan services. They are temporary and high impact specially designed instruction or related services delivered beyond the school day.

The purpose of these services is to quickly improve skill(s) and get the student to a level s/he would have been but for the school closures.

**HOW SERVICES ARE PROVIDED**

In person:
- small groups of students with similar needs,
- before or after school sessions, or
- tutoring.

Online (with the student and provider in real time):
- small groups of students with similar needs,
- before or after school sessions,
- tutoring or
- skill-based, before or after school Learning Labs.

COVID-19 Impact Services

What are they?
COVID-19 Impact Services are services in addition to the IEP or 504 Plan services that are needed to make up for significant skill loss(s) resulting from delayed, interrupted or inaccessible IEP services caused by school closures.

- Temporary, high impact specially designed instruction and related services,
- Beyond the regular school day, and
- Based on the student's current needs which may result in different services than were received in the past.

Who makes the decisions about COVID-19 Impact Services?
The IEP team or 504 Plan team determines:

- What services are needed
- How often and how long the services are needed
- Where and how the services will be delivered

How will the services be provided?
On-line with a Provider in Real Time OR In-Person

- Small groups of students with similar needs
- Before or after school sessions
- Tutoring
- Skill-based Learning Labs

A Checklist for a Total Distance Learning Plan

If you choose to have your child receive their education completely through distance learning due to COVID-19, a Free Appropriate Public Education (FAPE) must still be provided to the greatest extent possible, so that students with disabilities can continue to access learning opportunities. This includes all services, accommodations, and/or modifications listed in your child’s Individualized Education Program (IEP) to the greatest extent possible.

**STEP 1**

**IEP Team Meeting**

Ask for an IEP meeting to discuss the plan together. Be sure to include related service staff as well.

**STEP 2**

**Review IEP goals and objectives**

If the goals/objectives can be implemented through distance learning, ask how it will be done, who will be responsible for each goal, how often they are worked on, and how progress will be monitored.

**STEP 3**

**Review all services in the IEP**

Discuss with your team how related services will be provided, who will provide them and how often they will happen. Discuss and fill out the Telepractice Worksheet to see if your child can use technology to receive these services.

**STEP 4**

**Review accommodations and modifications**

Determine if the supports in your child’s IEP can be provided over distance learning. If they can, discuss how and when those supports will be provided.

**STEP 5**

**Identify Barriers**

Discuss barriers that may prevent your child from accessing their education through distance learning. Identify accommodations that will be provided to address the barriers. Also identify supports your family may need to help your child learn.

Source: Total Distance Learning Plan Checklist, Office of Student Support Services (July 31, 2020)
School Closure Contingency Plan Checklist

In the event that a school closes due to unforeseen safety concerns (like a natural disaster or disease outbreak), a Free Appropriate Public Education (FAPE) must be provided to the greatest extent possible, so that students with disabilities can participate in distance learning during a school closure.

Have an IEP Meeting

Your child’s IEP team includes parent(s)/guardian(s), a special education and general education teacher, school administrator and related service staff (OT, PT, ABA, etc.). If someone from your team needs to be absent, consider rescheduling the meeting; otherwise you will need to excuse them in writing.

Review Each IEP Goal

Discuss each goal and objective and determine how they will be implemented via distance learning. Who will implement each goal/objective? How often will they be implemented? How will progress be monitored? If goals and objectives cannot be implemented, how will your child be supported?

Review All Services in the IEP

Discuss how specially designed instruction and/or related services will be provided to your child. Who will provide the needed service and how often will it happen? Use a separate Telepractice Worksheet to see if your child can or should receive their related services virtually.

Review Accommodations and Modifications in the IEP

Can the accommodations and modifications listed in the IEP be provided to your child? How will that happen? When or in what situations will they be provided? Are there any additional accommodations/modifications needed to support access to distance learning?

Identify Any Barriers

Are there things that will keep your child from accessing their education through distance learning? Barriers could include academic, behavioral or environmental factors. What accommodations and modifications be used to address these barriers? Include any supports you will need as the parent or guardian to support your child.

Online Synchronous Instruction vs Online Asynchronous Instruction

Online instruction that happens in real time, with a teacher and students interacting in a virtual space.

Online instruction that does not happen in real time, with no direct teacher instruction.

Uses online platforms like Google Meet & Cisco Webex for live classes.

Uses self-guided lessons, websites, videos, teacher assignments, and posted class notes.

Provides classroom engagement, dynamic learning and depth of instruction.

Provides flexibility, self-directed learning and pacing on own time.

Requires a shared schedule where everyone has to be online at the same time.

Learners have more options for when they can use their devices and connectivity in a busy household.

Technical difficulties, on both sides, can lead to frustration and discouragement.

Risk of isolation, loss of interest in classwork and not turning in work due to lack of engagement and support.
